Netatmo Smart AC Controller

PN **NAC-EC**
RRP **120,90 €**
EAN **3700730504904**

Combine energy savings and comfort. For over 10 years, Netatmo has been creating solutions to cool and heat the home in a smart way. The Smart AC Controller lets users control their AC unit or air-to-air heat pump at any time, from anywhere using a smartphone. Your clients can set up a daily schedule tailored to their routine to cool and heat their homes when needed. With its built-in geolocation feature, "Eco-Assist", they won't waste any more energy. This Smart Controller lets users track and analyse the changes in their indoor environment using temperature and humidity sensors. It is compatible with various voice assistants and connected ecosystems, such as Google Home, Alexa and Apple Home. It only takes a few minutes to set up the product from the Home + Control app. All AC systems and air-to-air heat pumps that use an infrared remote and have a screen displaying its settings are compatible. If you have any doubts about the compatibility of a system, head to check.netatmo.com.
